Education

Arunai Engineering Colleg

Oct 2020 – June 2024

Bachelor of Engineering in Computer Science

CGPA: 7.4 / 10

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Web Development
- Database Management
- OOP in Java
- Operating System
- Software Engineering
- Computer Networks

Technical Skills

Languages: Java, HTML/CSS, JavaScript, SQL
Developer Tools: VS Code, Eclipse, Git and GitHub, Postman
Technologies/Frameworks: Spring Boot, React.js
Databases: MySQL, Oracle SQL, Postgre SQL

Summary

Motivated and detail-oriented Java Full Stack Developer with hands-on training in both frontend and backend technologies through comprehensive full-stack development bootcamps. Proficient in building responsive web interfaces using HTML, CSS, JavaScript, as well as developing robust backend systems with Java, Spring Boot, and MySQL. Experienced in building and testing RESTful APIs, and version control using Git. Currently seeking entry-level opportunities to apply full-stack skills in a dynamic and growth-oriented software development environment.

Projects

Banking System Management | *Java, Spring Boot, MySQL, REST API, Postman*

- Developed a backend system for core banking operations including customer management, account creation, deposits, withdrawals, and transaction tracking.
- Built RESTful APIs using Spring Boot and connected them to a MySQL database for persistent storage.
- Implemented proper API structuring using layered architecture (Controller, Service, Repository).
- Performed rigorous API testing and validation using Postman, ensuring correct request/response handling for all endpoints.
- Focused on clean code practices, error handling, and modular backend logic to prepare for frontend integration.

E-commerce Website | *HTML, CSS, JavaScript, Bootstrap*

- Designed and built a fashion-themed e-commerce website with responsive layouts for desktop and mobile.
- Implemented interactive UI elements like product cards, navigation bar, and search section using vanilla JavaScript.
- Used Bootstrap for icons and responsive design to ensure cross-device compatibility.
- Focused on clean design, mobile-first layout, and usability for a modern online shopping experience.
- Applied custom CSS media queries to enhance responsiveness and ensure consistent layout across various screen sizes and devices.

Student Management System | *Spring Boot, MySQL, Postman*

- Developed a backend Student Management System using Spring Boot and MySQL to handle student data efficiently.
- Built and tested RESTful APIs for CRUD operations on student records using Postman.
- Implemented database design with proper relationships, indexes, and validations for optimized queries.
- Ensured modular, maintainable code by following best practices in Java and Spring Boot architecture.

Training & Certifications

Java Full Stack Development Certification

JSpiders Training Institute

Java Developer with Spring Boot & Spring Framework

IBM, Coursera
